INTRODUCTION

In both fiction and nonfiction do you like to discover and ask questions of life and existence in a burning desire to know. Why are we here? What are we doing? Why is life so short and time so long? Can humankind reach the edges of the universe? Can we travel in thought? Has religion retarded our existence? Why is our history so fragmented and unreal? The premise of our life is explored in both fiction and non fiction. The extrasensory part of me has given spectacular profound answers slowly being revealed. Do you get fired up and wish to know more? The stunning answers are out there somewhere, and we all should be asking. New non fiction **MAGICAL THEORY OF LIFE** tries to explain some of these things.

In fiction, let me present Jim Long space agent. The stories encompass fabulous adventures in a series of stand-alone stories in 7 spellbinding, stimulating books including one as an episodic creation. Jim stirs the imagination travelling physically in space and spirit form in a mirror body moving into the vast realms of the astral and other dimensions of space and time. There are **two free episodes to download.** - **on my site**

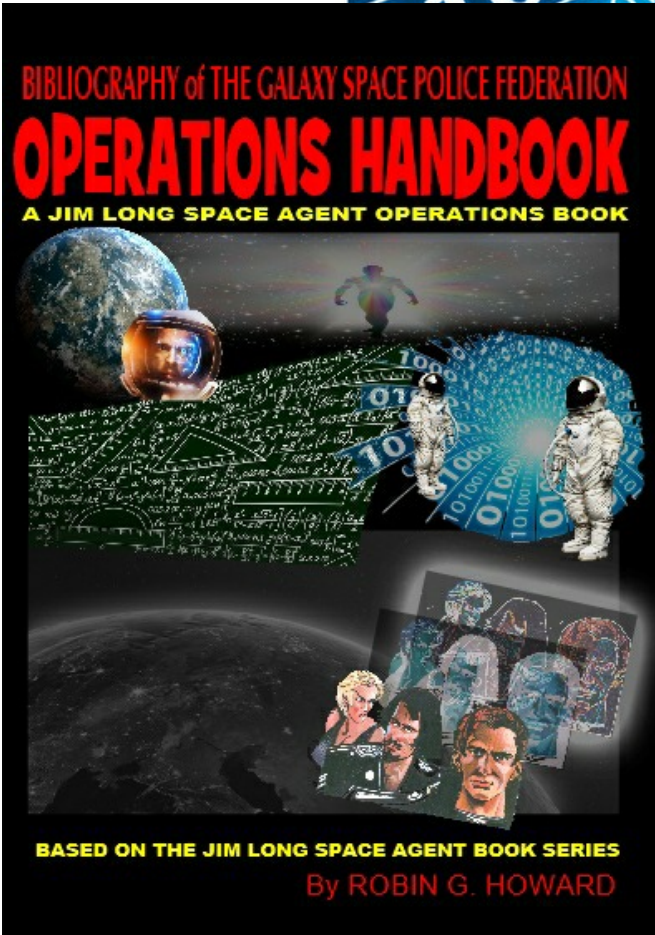

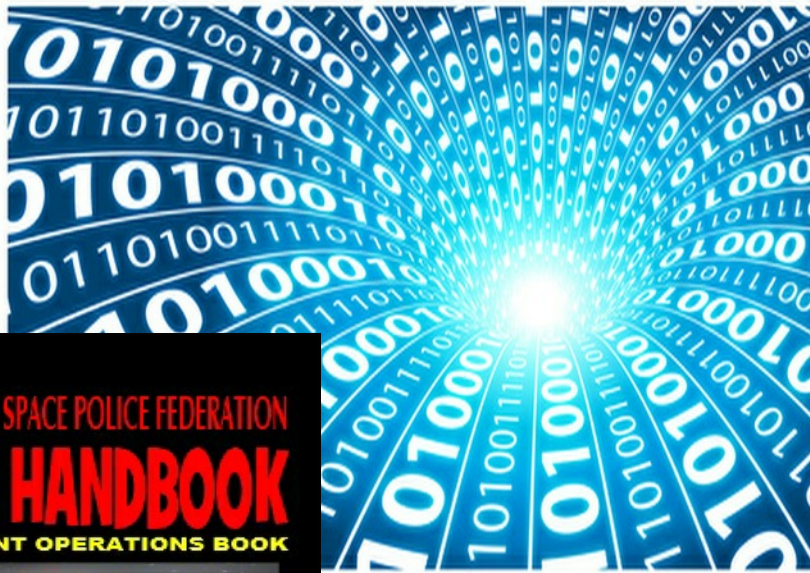

The future is arriving faster than you think
And it's all contained in these books.
FICTION - the Jim long space agent series.
NONFICTION - Magical Theory of Life.
- The Psychic Thinker.
- Magical Theory of Life.
